Research, Data, Management:

Data management basics and services for your daily research routine at the UMG

24 November 2017, at 11 - 12 am
In lecture hall 91/92 at the UMG

This information event addresses all researchers at the UMG.

During your daily research routine, digital research data occur in different amounts and forms (e. g. measuring data, pictures, videos, DNA-sequences etc.). What possibilities do exist to store and archive research data in a secure and sustainable manner to process the data further?

Meet the contact persons and get to know useful services supporting you during all phases of the research process.
