

GEORG-AUGUST-UNIVERSITÄT
GÖTTINGEN

Research Training Group 2300
„Enrichment of European beech forests with conifers“

Guest Lecture Series 2018
Wednesday, 2.15 pm, F 01 (Büsgenweg 1)

- April 11** **Cracking the nut of animal-mediated seed dispersal**
Jacob Dittel, PhD; Postdoctoral Research Associate, Oregon State University
- June 20** **Interspecific interactions in mixed spruce-beech forests**
Prof. Dr. Andreas Bolte; Thünen-Institut für Waldökosysteme, Eberswalde
- June 27** **Under the weather: root growth and physiology in response to water limitation**
Prof. Dr. Taryn Bauerle; Cornell University, KROOF Projekt München
- July 4** **Four decades of production ecology: the interaction of ideas and experiments**
Prof. Dan Binkley, PhD; Department of Ecosystem Science and Sustainability, Colorado State University
- July 18** **Mixed-species forests. Tracing mixing effects from the stand to the organ level**
Prof. Dr. Hans Pretzsch; Lehrstuhl für Waldwachstumskunde, TU München
