

GENDERED INNOVATIONS

Harnessing the Creative Power
of Gender Analysis for
Discovery and Innovation

Londa Schiebinger – Impulses for top level research

With her method of Gender Analysis Londa Schiebinger stimulates creativity in top-level research all over the world. Vivid case studies illustrate the benefits of a gender-sensitive perspective and methodology – especially for natural and life sciences.

Learn more about the possibilities to improve your research on these three events:

19.11.2018 | 18-20 p.m. | Pauliner Church

Evening Lecture: “How sex and gender analysis creates better research in natural and life sciences”

20.11.2018 | 12-14 p.m. | Faculty of Chemistry, Building E, Room MN30

Brown-bag Lunch: “How to apply Gendered Innovation in research”

20.11.2018 | 16-18 p.m. | Multi-Purpose Building (VG), Room 1.108

Workshop: “Political Plants. The movement, triumph and extinction of knowledge in the Atlantic World”

All interested are welcome, no registration required
