

# Opportunities for research stays of students and researchers at the National Institute of Informatics in Tokyo

Prof. Dr. Emmanuel Planas will present opportunities for fully funded research stays at the [National Institute of Informatics \(NII\)](#) in Tokyo, Japan, for master's students, PhD candidates, and postdoctoral researchers in Computer Science, Data Science, and related fields such as Mathematics, Physics, and Information Technology.

- **When:** April 15, 11:45 – 12:30
- **Where:** SUB Central Library, [conference room 3.103](#)
- **Participation via Zoom:** [gipplab.org/nii-info](https://gipplab.org/nii-info)

Located in the heart of Tokyo, NII is Japan's premiere institute for [all areas of computer science research](#) and global scientific data infrastructure support. Prof. Planas is the Director of NII's Global Liaison Office, which maintains close MOU partnerships with the University of Göttingen and over 100 other institutions worldwide.

NII welcomes master's and PhD candidates from MOU partner institutions for research internships spanning 3 to 6 months. Additionally, NII researchers can invite international colleagues for short-term stays or send team members abroad for research visits (up to 2 months) as part of the [MOU program](#).
