Hertha Sponer College Lecture with Marina Eck

Max-Planck-Institut für Multidisziplinäre Naturwissenschaften (MPI-NAT, City-Campus)

The Lecture Series of the Hertha Sponer College, which has been established at the Multiscale Bioimaging Cluster of Excellence (MBExC), is addressed to interested students, PhD candidates, postdocs, and PIs. The overall idea is to fundamentally explain research by providing an overview about the general aims of the six MBExC Research Alliances with special focus on the specific techniques that are developed and applied.
