20.11.2026 09:00 - 20.11.2026 18:00

Statistical Inference Across the Scales of Life

Max-Planck-Institut für Dynamik und Selbstorganisation (MPIDS)

A one-day workshop bringing together researchers working at the intersection of statistical inference, data-driven approaches, and quantitative methods in living systems. The workshop aims to explore how statistical and quantitative approaches can help uncover principles of biological systems across different scales. Registration is free, but please submit abstracts for posters and flash talks before November 6th 2026.
